

emsi Data Release Notes

EMSI Data 2013.4 Release: October 25, 2013

Today we announce the finalization of our 2013.4 data release, the fourth and final release of 2013. The most significant changes in this release are due to updated data sources.

Updated Data Sources in This Release

- **Current Employment Statistics, up to August 2013** (BLS). This dataset helps us form an estimate of 2013 annual job averages ahead of final, detailed figures from QCEW.
- **Quarterly Census of Employment & Wages, Q1 2013** (BLS). This is the most complete source for wage and salary industry employment data.
- **State Industry Projections.** In this release we use updated long-term industry projections for the following states: IN, KS, NH, NM, OK, SC, and WA. We collect long-term industry projections from each state on a regular basis.
- **Quarterly Workforce Indicators, Releases as of September 2013** (Census, LEHD). This source provides demographics by industry for jobs. (Different states have different data release schedules.)
- **SAM model sources:** Gross State Product (Bureau of Economic Analysis) and Census of Governments (Census Bureau) updates were incorporated in to EMSI's SAM model.

Classification and Methodology Changes

There were no major methodology changes for this release.

Note on NAICS 2012

QCEW 2011 onward (and CES) data are published in NAICS 2012 codes. EMSI currently converts this data back to NAICS 2007 codes. EMSI is planning to move all data to NAICS 2012 sometime in 2014.

Questions? Contact Us

If you have any questions or feedback about the new data, please contact Customer Solutions at (866) 999-3674 or via the online chat feature within EMSI Analyst.

Primary Industry/Occupation Data Source Information

This table contains information on our major data sources used for each EMSI release.
