Nursing

The Registered Nurse's unique function is to assist individuals, sick or well, in the performance of those activities contributing to health or its recovery (or to peaceful death) that they would perform unaided if they had the necessary strength, will or knowledge. And to do this in such a way as to help them gain independence as rapidly as possible.

Foreword

The Student Handbook is designed to provide nursing students with a ready reference manual for the Nursing Program. This Handbook deals specifically with the policies and procedures for the Nursing Program and serves to assist nursing students toward successful completion of their course of study. As such, it is intended to supplement, not replace, the policy and procedure publications to which all students of Montgomery College are subject, such as the:

- Current College Catalog
- Current Semester Schedule of Classes
- Student Handbook (Student Code of Conduct)
- College Policy and Procedure Manual

It is the responsibility of each student to review this Handbook regularly and to understand its contents.

Nursing students may want to consult nursing Course Guides and syllabi for further guidance with program policies.

This handbook should not be construed as constituting a contract, express or implied, between the Nursing Program and any person.

The statements and provisions in this handbook are subject to change at the discretion of the Nursing Program and without notice.

The most current version of the Nursing Student Handbook is on the Nursing Program’s website at www.montgomerycollege.edu/nursing

REV 7/2016 Davis
Section I: History of the Nursing Program

Montgomery College Nursing Program admitted its first class in 1966. Ms. Helen Statts was the guiding force behind the creation of the Montgomery College Nursing Program. She graduated from Garfield Memorial Hospital School of Nursing in Washington, DC around 1947. She was an instructor at Garfield Memorial Hospital School of Nursing. The Garfield School of Nursing was renamed the Washington Hospital school of Nursing. Ms. Statts later became the Director of the Washington Hospital School of Nursing. She received a Master of Science in Education with a major in nursing education from the University of Pennsylvania. She did post-master’s work in junior college preparation at the Universities of Pennsylvania and Maryland. She attended workshops in Administration of and Curriculum Development in Associate Degree Nursing Programs at Columbia University.

Ms. Statts hired Ms. Ellen Gloyd, another Garfield graduate, to assist her with the teaching. Under her leadership, the nursing program received accreditation with the National League of Nursing. The nursing program has maintained accreditation for fifty years.

In January 2004, the Nursing Program moved into the Health Sciences Center. The 98,000 – square-foot Montgomery College Health Center is a cornerstone of a $90 million expansion project for the Takoma Park Campus. The center houses the Helen A. Statts Nursing Center, a variety of health sciences programs, and a community clinic operated by Holy Cross Hospital. The nursing program continues to expand to meet the learning needs of the students and Montgomery County community. In October 2014, Holy Cross Hospital opened the Holy Cross Germantown Hospital on the campus of Montgomery College’s Germantown campus. This is the first hospital in the United States to be built on the campus of a community college.

During the 2017 academic year, the nursing program will commemorate 50 years of nursing education.
Section II: Philosophy of the Nursing Program

Nursing is a dynamic integration of art and science dedicated to meeting the needs of individuals and groups throughout the life cycle and along the health-illness continuum. All individuals are viewed holistically as having physical, emotional, intellectual, socio-cultural and spiritual needs. Using the nursing process to provide patient-centered care, the practice is devoted to promoting, maintaining and restoring the health of individuals, families, and selected groups as well as supporting a peaceful, dignified death.

Nursing Education is designed to prepare a diverse student body to provide safe and competent care to a variety of populations in a multi-cultural community with an increasingly global perspective. Acquisition of cognitive, psychomotor and affective skills is essential to competent nursing practice. Learning is enhanced when content is presented in a progressive sequence whereby complex knowledge and skills build upon previous learning. The General Education requirements provide a common, broad-based educational foundation.

The teaching-learning process is a vehicle for the achievement of program goals. The Nursing Program is a learning community where collaboration between educators and students results in professional growth and change. It is the educator’s role to facilitate learning by providing educational resources and serving as a role model. The educator further guides students in acquiring and synthesizing selected concepts of the nursing process. Student and educator participation, critical thinking, self-direction and accountability are essential to the success of the teaching-learning process and life-long learning. Multiple learning modalities and experiences accommodate individual differences in learning and support student success. A periodic appraisal of performance using a variety of methods provides reinforcement of desired behaviors and/or guidance toward change, and measures progress toward program goals.

The Associate Degree graduate nurse functions as a beginning practitioner of nursing, demonstrates clinical reasoning within the nursing process, to provide and manage care in a variety of settings. Graduate nurses recognize that teamwork and collaboration among health care professionals is critical to delivering safe, quality client care. Ongoing quality improvement activities are performed in concert with other members of the health care team. Application of evidence-based practice, skills in informatics, and client care technology is essential to the delivery of quality care while ensuring safety. Graduate nurses demonstrate professional conduct by exhibiting accountability for their actions, practicing within their scope of practice, and assuming legal responsibility for the care they provide. They uphold their commitment to the public by adhering to legal and ethical standards, which provides a context for making judgments and offers guidelines for maintaining professionalism.

Revised May 2013
Section III: Curriculum

A. Conceptual Framework

The conceptual framework of Montgomery College’s nursing curriculum is based upon:

**Core Curriculum Concepts:**

- Patient Centered Care
- Professionalism
- Informatics

- Teamwork and Collaboration
- Clinical Reasoning
- Safety

**Holism:**

A concept that views the individual as an interacting whole with interconnecting physical, emotional, intellectual, socio-cultural, and spiritual dimensions.

**The Five Dimensions of the Person:**
### B. Curriculum Glossary

<table>
<thead>
<tr>
<th>Accountability</th>
<th>Being attentive and responsive to the healthcare needs of individual patients. It is measured by the nursing standards defined in State Nurse Practice Acts and Regulations, the Scope of Practice, Professional Standards of Nursing Practice and other practice guidelines and protocols (Taylor, 2011, p. 206).</th>
</tr>
</thead>
<tbody>
<tr>
<td>Caring</td>
<td>In clinical practice [caring] is “developing and sustaining a helping-trusting, authentic caring relationship and being present to, and supportive of, the expression of positive and negative feelings as a connection with deeper spirit of self and one-being-cared-for” (Watson, 2001).</td>
</tr>
<tr>
<td>Clinical Procedures</td>
<td>Nursing interventions performed in the clinical setting to assist patients achieve optimal health. Also refers to specific clinical techniques utilized by interdisciplinary healthcare providers.</td>
</tr>
<tr>
<td>Clinical Reasoning</td>
<td>The ability to form judgments as the clinical situation changes taking into the account the context and concerns of the patient and family (Benner, et al., 2010, p. 85).</td>
</tr>
<tr>
<td>Collaboration</td>
<td>Function effectively within nursing and inter-professional teams, fostering open communication, mutual respect, and shared decision-making to achieve quality patient care (QSEN Institute, 2007).</td>
</tr>
<tr>
<td>Communication</td>
<td>The process of sharing information; process of generating and transmitting meaning (Taylor, 2011, p. G-4).</td>
</tr>
<tr>
<td>Community</td>
<td>Specific population or group of people living in the same geographic area under similar regulations and having common values, interests, and needs (Taylor, 2011, p. G-4).</td>
</tr>
<tr>
<td>Concept Map</td>
<td>Instructional strategy that requires learners to identify, graphically display, and link key concepts (Taylor, 2011, p. G-5).</td>
</tr>
<tr>
<td>Conceptual Framework</td>
<td>Set of concepts, along with the statements that arrange the concepts into an understandable pattern (Taylor, 2011, p. G-5).</td>
</tr>
</tbody>
</table>
| Critical Thinking | 1. Thought that is disciplined, comprehensive, based on intellectual standards, and, as a result, well-reasoned; a systematic way to form and shape one’s thinking that functions purposefully and exactlying. (Taylor, 2011, p. G-5).  
2. Reasoning is based on organized, purposeful, and disciplined thought which may lead to new ideas, plans, and conclusions. Critical thinking involves application of elements, traits, intellectual standards and abilities (Paul, 1993). |
<p>| Culture | The sum total of human behavior or social characteristics peculiar to a specific group and passed from generation to generation or from one to another within the group (Taylor, 2011, p. G-5). |</p>
<table>
<thead>
<tr>
<th>Cultural Competence</th>
<th>The process in which the nurse continuously strives to achieve the ability and availability to effectively work within the cultural context of a client (individual, family, community) (Campinha-Bacote, 2005). The attitudes, knowledge and skills necessary for providing quality care to diverse</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ethical/Legal Standards</td>
<td>Ethical standards are a profession's codified position on moral duty, values, obligations and the distinction between right and wrong. Legal standards are society's written mandates of required actions and limits on behavior (Hall, 1996).</td>
</tr>
<tr>
<td>Evidence-based Practice</td>
<td>Integrate best current evidence with clinical expertise and patient/family preference and values for delivery of optimal health care (QSEN Institute, 2007).</td>
</tr>
<tr>
<td>Health</td>
<td>State of optimal functioning or well-being (Taylor, 2011, p. G-9).</td>
</tr>
<tr>
<td>Health Care Provider</td>
<td>Refers to a licensed independent provider; may include, medical/surgical doctors, physician assistants, or nurse practitioners.</td>
</tr>
<tr>
<td>Health-Illness Continuum</td>
<td>Degree of client wellness that exists at any point in time, ranging from an optimal wellness condition, with available energy at its maximum, to death which represents total energy depletion (Neuman Systems Model, 2011).</td>
</tr>
<tr>
<td>Holism</td>
<td>Recognizes the totality of the human being – the interconnectedness of body, mind, emotion, spirit, social/cultural, relationship, context, and environment (American Holistic Nurses Association, 2012).</td>
</tr>
<tr>
<td>Illness</td>
<td>Abnormal process in which any aspect of the person’s functioning is altered (in comparison to the previous condition of health) (Taylor, 2011, p. G-10).</td>
</tr>
<tr>
<td>Informatics</td>
<td>Use information and technology to communicate, manage knowledge, mitigate error, and support decision-making (QSEN Institute, 2007).</td>
</tr>
<tr>
<td>Knowledge Management</td>
<td>A discipline that promotes an integrated approach to identifying, capturing, evaluating, retrieving, and sharing an organization’s information assets. These assets may include databases, documents policies, and procedures (Koenig, 2012).</td>
</tr>
<tr>
<td>Management of Resources</td>
<td>The process of using the company’s resources in the most efficient way possible. These resources can include tangible resources such as goods and equipment, financial resources, and labor resources, such as employees (Business Dictionary, 2013).</td>
</tr>
<tr>
<td>Nurse Practice Act</td>
<td>State laws and regulations pertaining to nursing practice (MBON, 2013).</td>
</tr>
<tr>
<td>Nursing Process</td>
<td>A five step systematic method for giving patient care; involves assessing, diagnosing, planning, implementing and evaluating (Taylor, 2011, p. G-14).</td>
</tr>
<tr>
<td>Patient-centered Care</td>
<td>Recognize the patient or designee as the source of control and full partner in providing compassionate and coordinated care based on respect for populations (American Association of Colleges of Nursing, 2008).</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>------------</td>
<td>------------------------------------------------------------------</td>
</tr>
<tr>
<td>Professionalism</td>
<td>The habitual and judicious use of communication, knowledge, technical skills, clinical reasoning, emotions, values, and reflection in daily practice for the benefit to the individual and community being served (Kirk, 2007).</td>
</tr>
<tr>
<td>Safety</td>
<td>Minimize risk of harm to patients and providers through both system effectiveness and individual performance (QSEN Institute, 2007).</td>
</tr>
<tr>
<td>Simulation</td>
<td></td>
</tr>
<tr>
<td>Teaching</td>
<td>Planned method or series of methods used to help someone learn (Taylor, 2011, p. G-20).</td>
</tr>
<tr>
<td>Teamwork</td>
<td>See Collaboration.</td>
</tr>
</tbody>
</table>

**C. Nursing Educational Outcomes**

Upon completion of this program a student will be able to:

1. Maintain legal, ethical, evidence-based and professional standards in nursing.
2. Utilize clinical reasoning in practice.
3. Practice patient centered care.
4. Demonstrate teamwork and collaboration.
5. Effectively use current technology and informatics.
6. Ensure a safe environment for patient, self, and others.

*Revised 2013*
**D. Nursing Program Outcomes**

The Montgomery College Nursing Program will:

1. Graduate students whose nursing practice includes self-evaluations of their clinical judgment in relation to information, concepts, conclusions and other elements of critical thinking as measured by a 90% aggregate score of “Strongly Agree” or “Agree” on the Graduate Survey.

2. Graduate students who are capable of effective written, verbal, and nonverbal communication with patients, groups and members of the health care team maximizing patient outcomes as measured by a 90% aggregate score of “Strongly Agree” or “Agree” on the Graduate Survey.

3. Graduate students whose nursing interventions assist the patient towards optimum health as measured by a 90% aggregate score of “Strongly Agree” or “Agree” on the Graduate Survey.

4. Graduate students who demonstrate a commitment to professional development in areas related to participation in continuing education, membership in professional organizations, and participation in scholarly activities as measured by a 95% aggregate score of one (1) or more on the Graduate Survey.

5. Graduate students who indicate satisfaction with their program of learning as measured by a 90% aggregate score of “Very Satisfied” or “Satisfied” on the Graduate Survey.

6. Graduate classes that achieve a 90% job placement rate of those seeing employment, per the Graduate Survey.

7. Graduate classes that achieve a pass rate on the NCLEX that is at least equal to the required Maryland BON pass rate.

8. Maintain accreditation from the Maryland Board of Nursing.

9. Maintain accreditation from the Accreditation Commission for Education in Nursing.
Section IV: Courses

A. Sequence of Courses

The nursing curriculum is dependent upon proper sequencing of courses. The general education courses (non-nursing) in the nursing curriculum are to be completed prior to or during the semester in which they are listed in the College Catalog. Nursing courses must be completed in the sequence described in the catalog. The student is to meet with his/her designated faculty advisor to plan his/her course of study for each semester. The student is responsible for meeting all pre or co-requisites. A student will be denied registration or administratively dropped from a course if pre or co-requisites have not been met. Each nursing course may only be attempted twice.

**Total credit hours 66**
Nursing Courses

NURS 113 Fundamentals of Nursing
Introduces the theoretical concepts of clinical reasoning, nursing process, teaching-learning, culture, caring, growth and development, evidence- based practice, delegation, conflict and basic human needs as they relate to nursing care. Psychomotor and affective skills are taught and practices. (TP/SS only) PRE- or COREQUISITES: BIOL 212, NU 121, and either PSYC 102 or PSYC 203; or consent of program coordinator. COREQUISITE: NURS 114. Three hours lecture/discussion, 12 hours laboratory each week. 7 semester hours

NURS 114 Professionalism and Communication in Nursing
Facilitates the student’s entry into the nursing program and the health care system. Emphasis is placed on concepts related to professional practice and the development of communication skills necessary for nursing practice. Legal and ethical issues related to health care are introduced. Therapeutic communication, documentation and delegation are examined and practiced. PREREQUISITE: Admission to the nursing program or consent of program coordinator. PRE- or COREQUISITE: NURS 113. Three hours laboratory each week. 1 semester hour

NURS 121 Basic Health Assessment
Instruction and guided practice in the assessment techniques utilized to gather subjective and objective data from patients. Emphasis is placed on the nursing process as it relates to health assessment. Therapeutic communication skills are taught and practiced. Documentation of assessments is stressed. PREREQUISITE: Admission into the nursing program or permission of department. PRE- or COREQUISITE: BIOL 213. Three hours laboratory each week. 1 semester hour

NURS 125 Nursing in Health and Illness I
Introductory medical surgical nursing course which builds on the conceptual foundations and core integrated nursing concepts taught in previous courses. Nursing concepts are applied in an interdisciplinary practice environment where prevention, promotion, maintenance and restoration of health throughout the lifespan is emphasized. PREREQUISITES: A grade of C or better in BIOL 212, NURS 113, NURS 114, NURS 121, PSYC 102 or PSYC 203. PRE or CO-REQUISITES: BIOL 213 and Math Foundation, or consent of program coordinator. CO-REQUISITES: NURS 126. Two hours lecture, six hours laboratory each week. 4 semester hours

NURS 126 Nursing Care of Special Populations I: Geriatric and Psychiatric Nursing
Introduces concepts related to mental health and illness across the lifespan as well as the unique physiologic and psychosocial needs of the older adult. Healthy aging of the older adult patient is emphasized. PREREQUISITES: A grade of C or better in BIOL 212, NU 113, NU 114, NU121, PY102 or PSYC 203. PRE or CO-REQUISITES: BIOL 213 and Math Foundation, or consent of program coordinator. CO-REQUISITES: NURS 125. Two hours lecture, six hours laboratory each week. 4 semester hours
NURS 129 Pathophysiology and Pharmacology in Nursing
Introduces pharmacodynamics, pharmacokinetics and pharmacotherapeutics of various classifications of medications as they relate to basic pathophysiology seen in each body system. Emphasis is on the nursing implications and patient education required for safe administration of each class. Students explore the role and responsibility of the registered nurse in administering and evaluating medications.
PREREQUISITES: A grade of C or better in BIOL 212, NURS113, NURS 114, NURS 121, PSYC102 or PSYC 203. PRE or CO-REQUISITES: BIOL 213 and Math Foundation, or consent of program coordinator. Two hours each week. 2 semester hours

This course must be completed prior to registering for NURS 225 and NURS 226 in the third semester of the nursing program.

NURS 205 Transition to Professional Nursing Practice
Facilitates the graduate's entry into the profession of nursing, including trends in the scope of practice and roles of the nurse in an ever-changing health care delivery system. Includes delineation of the major functions of professional nursing organizations, principles of management and coordination of nursing activities, accountability in nursing practice (quality improvement), identification of socio-political factors influencing professional nursing, and an introduction to nursing research. Legal and ethical responsibilities related to nursing practice are further considered. Must be taken in second year. One hour lecture each week. 1 semester hour

NURS 225 Nursing in Health and Illness II
Intermediate medical-surgical nursing course continues the progression of concepts learned in the first two nursing semesters. Students now apply the basic principles learned in prior nursing courses to patients with complex, multi-system disease processes. Core integrated nursing concepts include: safety, clinical reasoning, patient centered care, interdisciplinary collaboration, professionalism, informatics and evidence based practice. Students are now expected to assess, plan and deliver care, evaluate outcomes, and critically reflect on learning while providing care for multiple complex medical-surgical patients.
PREREQUISITES: A grade of C or better in BIOL 213, NURS 125, NURS 126, NURS 129 and mathematics foundation or consent of program coordinator. PRE- or CO-REQUISITES: BIOL 210, English Foundation. CO-REQUISITES: NURS 225. Two hours lecture/discussion, six laboratory hours each week. 4 semester hours

NURS 226 Nursing Care of Special Populations II: Maternal/Child Nursing
Provides the student opportunities to implement the nursing process in acute and community settings. The focus of care is on women and the family during the childbearing cycle, the newborn, and the child through adolescence. PREREQUISITES: BIOL 213, NURS 125, NURS 126, NURS 129 and mathematics foundation or consent of program coordinator. PRE- or CO-REQUISITES: BIOL 210, English Foundation. COREQUISITES: NURS 225. Three hours lecture/discussion, six laboratory hours each week. 5 semester hours

NURS 240 Nursing in Health and Illness III
Concentration is placed on the principles involved in organizing, managing and delivering care appropriate for the adult with various complex health problems. The focus moves from self-limiting and chronic health issues to acute emergent care of the adult patient. This course will also encompass additional management and leadership concepts in nursing. PREREQUISITES: A grade of C or better in BIOL 210, English Foundation, NURS 225 and NURS 226. PRE- or COREQUISITES: Sociology Course either: SOCY 100, 105, 214 OR 240 will meet the Behavior and Social Sciences Distribution (BSSD) requirement, arts distribution and humanities distribution. COREQUISTE: NURS 205. Three hours lecture/discussion, 12 hours laboratory each week. 7 semester hours
**B. Dual Admission Pathway**

**MC to University of Maryland School of Nursing**

Montgomery College (MC) and the University of Maryland, School of Nursing (UMSON) have entered into a Dual Admission Program agreement that offers simultaneous admission to MC’s associate degree in nursing (ADN) and UMSON’s bachelor of science nursing degree (BSN). This is a three plus one year(s) (3+1) agreement. As an MC nursing student in the Dual Admission Program, you can begin taking UMSON courses to fulfill the requirements for the BSN during your third and fourth semesters. Once you complete the ADN and obtain an RN license, you complete the final year of study at UMSON.

**ELIGIBILITY**

To apply for the Dual Admission Program, you must have a minimum overall GPA of 3.0 and a minimum science GPA of 2.75. The science GPA is based on the following courses: Microbiology (BIOL 210), Human Anatomy and Physiology I (BIOL 212), Human Anatomy and Physiology II (BIOL 213), and Chemistry (CHEM 131).

**APPLICATION PROCESS**

You must submit a separate application to UMSON with the following: online application, application fee, official transcripts from every college or university attended, essay (part of online application), résumé, and the UMSON prerequisite course list. Apply no later than your second semester in the MC nursing program. Deadlines are December 1 (fall) and May 1 (spring).

Prerequisites: Students applying for the Dual Admission Program cannot have more than six outstanding prerequisite courses in their fall or spring semester prior to enrollment at UMSON.

For additional information, email adntobsn@montgomerycollege.edu

**C. Advanced Placement Pathway**

**LPN/Military Medic/Corpsmen to Associate’s Degree Nursing Pathway**

The statewide model states that individuals with an active unencumbered Maryland or compact Licensed Practical Nurse (LPN) articulating to the Associate Degree level are awarded a maximum of one year of nursing courses in the program they are entering following successful completion of the program's transition course(s), if required.

Military Medic applicants with documented past or present status of a “Navy Corpsman: NER-HM-004”, “Army 91WM6”, or “USAF4NO” skill identifier are eligible to participate in this advanced placement option into the Nursing Program.
**NURS 130 – Transition Course**

Designed to ease the transition of Maryland Licensed Practical Nurses (LPN) and military medic/corpsmen into the Associate Degree (AD) nursing program. Specific concepts drawn from the first year of the AD nursing program, related to professional nursing practice, are taught. Other concepts familiar to LPNs and military medics/corpsmen are expanded in both breadth and depth. The nursing process is stressed with a focus on health assessment and the use of concept maps for planning, implementing, and evaluating nursing care. All aspects of professional communication are explored and practiced. Supervised clinical experiences enhance the LPNs and military medic/corpsmen’s grasp of professional nursing care for clients with alterations in the physiological and psychosocial processes. (T only)

**PREREQUISITES:** Admission to the nursing program or consent of the program coordinator. A grade of C or better in BIOL 212, BIOL 213, mathematics foundation, and ENGL 102/103, highly recommend completion of BIOL 210. Seven hours lecture/discussion, 14 hours laboratory each week for thirteen weeks.

---

**D. Articulation Agreements**

Transferring Credits to a BS/MS Nursing Program in Maryland State Colleges and Universities

**RN to BSN ARTICULATION MODEL**

There are several models for the RN to BSN program. Models are dependent upon the articulation or transfer agreement between the college/university. The statewide model states that, no more than half of the baccalaureate degree (120 credits), with a maximum of 70 non-nursing credits, will be accepted from a community college. Nursing credits will not be transferred. However, individuals with an active unencumbered Maryland or compact RN license articulating to the baccalaureate level are awarded a minimum of 30 upper division-nursing credits in the program they are entering. Transfer Programs may include general education courses and awarding of credits for the unencumbered license. Students are advised to check with their transfer college/university choice.

Colleges/Universities offering the RN to BSN may require General Education courses not included in Montgomery College’s AS Program. Examples for some colleges/universities may include: PSYC 203 Human Growth & Development during the Lifespan, SOCY 101 Introduction to Sociology, BIOL 213 or FM 103 Nutrition, MATH 116 Elements of Statistics and additional arts and humanities electives. Please contact the school of choice for specific requirements.

**RN to MSN ARTICULATION MODEL**

Some universities are offering RN to MSN programs, which do not require a BSN degree. Students should check with their transfer college/university choice for requirements for admission and program information.
Section V: Student Advising

A. Advising Appointment

All nursing students are assigned to a full-time nursing faculty advisor from enrollment to graduation. Students are expected to schedule an appointment with their faculty advisor at least once each semester to discuss the course sequencing and overall academic performance. The advising appointment is expected to be completed no later than the eighth (8th) week of the semester. The faculty advisor will complete the registration clearance for the next semester’s courses. Additional advising meetings may be scheduled at the request of the student, the advisor, or a faculty member regarding concerns about the student’s performance or other school related issues.

B. Registration

Students will receive a Registration Memo from the Program Chair indicating dates and times of upcoming nursing registration. Students should not register online prior to the nursing registration.

Students must schedule a meeting with their advisor to review the academic record and health requirements confirming pre-requisites have been completed before the faculty advisor clears a student to register for the next semester nursing courses. The faculty advisor completes the “Proof of Advising” form with a signature, date, and stamp. All required health items must be current for registration.

During the course registration, all students will receive their CRN for both theory and clinical courses. Students may be pre-placed for clinical experiences. If employed at assigned clinical agency, student must provide documentation and may be placed in another clinical agency.

Students are expected to register online using the exact CRN’s provided during registration. Failure to do so will result in automatic withdrawal from the course. All pre- and co-requisite courses must be accounted for in Banner or nursing registration will be blocked. Also, all co-requisite courses must be registered at the same time for registration to proceed.

**Clinical sites are subject to change**

C. Graduating Students

Faculty advisors are expected to communicate the graduation requirements to students entering the fourth (4th) semester. Students must complete the Graduation Application online: Click on "Online Graduation Application" under "Apply for Graduation" and complete the steps.

Note: If you have submitted a graduation application for the next term, then you should not submit additional applications, unless they are for different certificates or associates. If you applied for graduation and did not graduate, you will need to re-apply for the next semester.

Open periods for online graduation application:
1. Fall: June 2 - October 1
2. Spring: October 2 - February 15
3. Summer: February 16 - June 1
A. Reference Letters

Students are encouraged to email faculty and staff to request a letter of recommendation or reference for educational advancement, externships, or employment. Students are encouraged to be thoughtful of the time of requests. Student requests made during the winter and summer sessions may not be completed until faculty/staff return during the next semester. Faculty members will communicate with students to confirm or deny a request for a letter of reference. If the faculty agrees to complete the letter of reference, they will request an electronic copy of your resume and will provide an electronic copy of the letter of reference request. The faculty and staff will establish a timeline with the student for timely completion. Faculty/staff and students will establish the guidelines for submission of the reference. Students can also obtain the letter of reference request form from the Nursing office. The request form and resume can be electronically sent to the faculty and staff. Another option: students can submit the paper form and resume to the Nursing Office for faculty and staff to pick up.
Section VI: Resources

A. Academic Success Plan
Faculty may initiate an Academic Success Plan (ASP) for students exhibiting difficulty in meeting course objectives. The ASP is posted on the Blackboard course sites and may be initiated at the state of the semester for students. Emphasis will be placed on students who are repeating course or received a final grade of “C” in a previous nursing course. Faculty will meet with students to provide feedback on the student’s success plan. The faculty and the student will sign the signature page; the document will be saved securely. See appendix VII.

B. Disability Support Services
Any student who may need an accommodation due to a disability should make an appointment to see the Course Coordinator during office hours. A letter from Disability Support Services (DSS) authorizing accommodations will be needed. The DSS office is located in ST/120, the phone number is: 301-650-1480 (TDD, 301-587-7207). Any student who may need assistance in the event of an emergency evacuation must identify to the Disability Support Services Office; guidelines for emergency evacuations for individuals with disabilities are found at: www.montgomerycollege.edu/dss/evacprocedures.htm.

C. Learning Skills Support Services
Assistance in study skills, time management, test-taking skills, hints on how to take notes more effectively, liaison with other on-campus or community resources--all of these support services and many more are offered through LSSS. This program is designed to provide assistance for academic success to students in career and technical programs, including nursing. A wide variety of support services are offered. For more information or to request assistance, please call the Resource Center at 240-567-5553. Additional information can be found at: http://www.montgomerycollege.edu/exploremc/learningcenters.html http://www.montgomerycollege.edu/Departments/lsstp/

D. Medical Learning Center
The center houses many learning materials for students to use during their educational studies at Montgomery College. The Medical Learning Center (MLC) has state of the art computers, books, videos and a comfortable environment for students to learn. Montgomery College identification is required upon entry. The MLC is located in HC 221. For more information or to request assistance, please call 250-567-5591. Additional information can be found at: http://www.montgomerycollege.edu/Departments/medlearntp/

Medical Learning Center’s Mission:
- To provide an environment for students to study individually or in groups
- To assist students in using computer software applications to complete assignments, projects and presentations
- To provide appropriate computer software, audio-visual materials, videos, anatomy models, books, a scanner and journals to enhance student learning
- To provide an environment for Health Science students who need special accommodations when taking tests
• To provide tutoring services for students attending Montgomery College
• To provide faculty and staff an area to work as a group during Health Science professional development training

E. Nursing Skills Simulation Center

The Nursing Skills and Simulation Center (NSSC) is a resource for students to learn, practice and demonstrate nursing care in a safe learning environment. In this setting, students work with human patient simulators and health care supplies and equipment to prepare them for actual patient care.

Teamwork, communication skills and nursing professionalism are the basis for all practice in the NSSC. The center is staffed by instructors who are registered nurses and available to guide students generally during open lab time and also by appointment. Open lab hours are posted outside of the lab and are noted on the nursing skills blackboard site.

All students are required to self-enroll in Nursing Skills and Simulation Lab blackboard site for information, resources, and announcements. Information on self-enrollment is distributed at registration and is also available in HC321.

Required practice hours vary with each nursing course and can be found in the course syllabus. The required hours are documented on the lab tracking form that is distributed to each student at the beginning of the semester. Lab staff sign tracking forms as practice is completed. If the tracking form is not signed at the time practice is completed, that practice session cannot be documented at a later time.

Students may be given a lab referral by their clinical instructor, requiring a student to schedule individual time with a nursing lab instructor for additional guidance. The student can use the lab calendar on the blackboard site to view available appointment times. Appointments can be made via email or in person, and are one-to-one time with a lab instructor to work on the area identified in the lab referral. Making the appointment as soon as possible after receiving the referral should ensure completion by the deadline. Appointments can also be used if a student would like additional individualized practice time without a lab referral form.

Students may also be required to attend sessions on lab clinical days in order to complete missed clinical or lab hours. The lab clinical days are held monthly and consist of review sessions and virtual simulation activities that are applicable to most levels of nursing students. Referrals for lab clinical days are made by the clinical instructor to the student and nursing lab coordinator via an email specifying the number of hours required. Students are then emailed the list of scheduled activities and must notify the lab coordinator what sessions they plan to attend based on their class schedule and level in the program. Depending on the number of students referred for missed clinical days, additional nursing students may also participate in these scheduled activities for learning enrichment and skills practice.

Manual blood pressure check offs that are required for second, third and fourth semester students, can be completed during designated times indicated on the nursing skills lab blackboard calendar. Students are requested to supply another student whose blood pressure is checked.
Guided practice sessions are scheduled regularly and are posted on the nursing skills lab blackboard calendar. Instructions for attendance are included on the blackboard posting. Some sessions have unlimited attendance capacity, but others require registration.

On-campus lab locations are posted weekly by the first floor HC elevator, and on the third floor student lounge window. Lab clinical days activities locations are also posted in these areas.

The NSSC is a clinical simulation area and OSHA guidelines for hospitals apply in the lab. Hand washing is required on entry and prior to working with any of the mannequins, and no eating or drinking is permitted in labs. The Montgomery College student lab coat is required over street clothes when in the practice lab. An MC nursing uniform is required attire for scheduled simulations. Children are not permitted in the NSSC.

Students are required to use the sign in computer when entering and leaving the practice lab. Directions are posted next to the computer, and lab staff can assist if needed.

Certain supplies are distributed in on-campus labs and should be kept to use for practice. General supplies and are also available in the practice lab. Sharps should not be reused or removed from any labs under any circumstances.

Scheduling lab practice time other than open lab hours, and reserving lab space and equipment for course projects can be arranged via email, phone or in person with Patsy O'Meara, patricia.omeara@montgomerycollege.edu, 240-567-5621.

If a student has a known latex allergy, a letter from their health care provider, including risks and treatment, must be provided for their student file. The NSSC uses latex free supplies, but equipment may occasionally contain latex. Notify the lab coordinator and your clinical instructor if you have a latex allergy.

Laptop computers are accessible in the main practice lab at each bedside. DocuCare, skills modules and skills practice checklists can be accessed via the laptops and students are encouraged to utilize these resources when practicing skills. Books and DVDs are available from the lab desk to supplement practice activity, but cannot be removed from the main practice lab.

Please notify the lab staff of any equipment problems, and leave your work area in order prior to leaving the lab.

Cellphone calls should be taken outside of the lab, and all students are expected to conform to the Montgomery College Student Code of Conduct.

Rev 6/2/16 PO
F. Barbara L. Nubile Simulation Center
Faculty will be responsible for student access during simulations. The Simulation center faculty or staff will supervise all participants to ensure safety and to prevent injuries (e.g. AED, needles, chemicals, etc.) during simulation experiences. All simulation suite doors will remain closed and red-lighted at all times.

UNIFORM
Simulation is a clinical activity. The students must be in full uniform to participate in simulation activities.

BRIEFING
All students will participate in the briefing prior to the scenario. This includes:
1. Orientation to the simulation environment
2. Review of learning expectations and objectives of the scenario
3. Clarify roles and expectations of participants
4. Establish a fiction contract
5. Review contents of confidentiality agreement

DURING SIMULATION
1. Maintain strict confidentiality
2. Treat the manikin as you would treat a real patient
3. No cell phones, food or drink, or pictures
4. Students Roles: Primary nurse, Student nurse/Secondary nurse, Charge nurse, Observer

DEBRIEFING
All simulation experiences will be followed by a formatted debriefing session. Debriefing for Meaningful Learning (DML) is the primary method used for debriefing.

EVALUATION
Weekly clinical evaluation tool (WCET) and or Creighton Competency Evaluation instrument (CCEI) will be used to evaluate students after the simulation experience.

We believe that our learners are intelligent, motivated to learn, care about doing their best and want to improve (Centers for Medical Simulations)

Rev 7/14/16 RKS

G. Veteran’s Services
If you are a veteran or on active or reserve status and you are interested in information regarding opportunities, programs and/or services, please visit the Combat2College Web site at www.montgomerycollege.edu/combat2college.
Section VII: Student Engagement

A. Communication

Student Privacy (FERPA)

When enrolled in the Nursing Program, as a student at Montgomery College, your education record information is protected by FERPA. The Family Educational Rights and Privacy Act [FERPA] of 1974 is a federal law that requires Montgomery College to treat your education records in a legally specified manner.

As a student, under FERPA you have the following rights:

1. The right to inspect and review your own education records within 45 days of the day the College receives a request for access.
2. The right to request to amend of your education records if you believe they are inaccurate or misleading.
3. The right to limit the disclosure of personally identifiable information designated by the College as "directory information."
4. The right to file a complaint with the U.S. Department of Education concerning an alleged failure by the College to comply with the requirements of FERPA. The name and address of the office that administers FERPA is:

   Family Policy Compliance Office
   U.S. Department of Education
   600 Independence Avenue, S.W.
   Washington, D.C. 20202-4605

E-Mail

Effective communication between faculty, staff and students include the appropriate and professional use of e-mail. Students are expected to communicate with faculty and staff using only the Montgomery College e-mail account. Students are NOT to use the Blackboard email system. Students are expected to check their email regularly. Students are held responsible for information, assignments, and announcements that are distributed via e-mail. Please include full name, the nursing courses currently enrolled and MC ID number in all emails. Students can anticipate a 48-72 hour e-mail response time from faculty and staff during business hours: Monday-Friday 8 AM to 4:30 PM.

Nursing Program and Course Websites

The nursing program posts announcements and changes on the program web site. Individual nursing courses also use Blackboard web sites for posting course specific information and announcements. Students are responsible for being aware of information posted on pertinent nursing web sites.

Communication Accountability

If a student has a concern, complaint or grievance regarding any aspect of the Nursing Program, the following steps are to be taken:
• Step 1: Meet with clinical instructor and/or course faculty.
  o If unresolved, move to step 2.
• Step 2: Meet with the Course Coordinator.
  o If unresolved, move to step 3.
• Step 3: Meet with the Nursing Program Chair.
  o If unresolved, move to step 4.
• Step 4: Meet with Nursing Program Director
  o Final attempt at resolution within the Nursing Program.
  o If unresolved, Director will arrange a meeting with the Dean of Health Sciences.

Civility
Civility is expected in classroom and clinical settings. Rude or disruptive behavior will not be tolerated. This behavior will lead to disciplinary processes. See college policy on Student Code of Conduct.
  1. Do not make disparaging remarks about employees or co-workers. Do not make threatening, harassing, profane, obscene, sexually explicit, racially derogatory, homophobic or other offensive comments.
  2. Do not post content or otherwise speak on behalf of the employer unless authorized to do so and follow all applicable policies of the employer.

B. Nursing Student Peer Mentoring Program
The purpose of the nursing student peer-mentoring program is to assist the 1st semester nursing student with their transition, challenges, and progression in nursing school. When a student (2nd, 3rd, or 4th semester) has been through a specific course or program and interacts with a 1st semester student who is currently enrolled in that program, he/she provides:
  1. Information concerning campus, course concepts, and activities
  2. Support in social and academic progression
  3. Encouragement towards academic success
  4. Open communication by engaging and promoting a positive relationship

Nursing Student Peer Mentoring Program applications are available in the Nursing Skills and Simulation Center (NSSC) for mentors and mentees. Refer to the Lab Blackboard Site for more information.

C. Nursing Club
The Nursing Club is an officially recognized student organization at Takoma Park. Each nursing student is automatically a member of this club. The purposes of the Club are to:
  1. Provide a forum for discussion of issues involving campus and/or community activities.
  2. Provide opportunities for leadership development, public speaking and legislative activity.
  3. Develop partnerships and communication with community agencies.
  4. Plan the graduation pinning ceremonies.
Students are encouraged to participate in the Nursing Club. The club offers opportunities for leadership training and professional development by assisting in activities such as information sessions, health fairs, blood drives, and March of Dimes Walk-A-Thons. Students plan and implement their own programs with assistance from faculty advisors.

**D. Alpha Delta Nu Nursing Honor Society: Beta Chi Chapter**

The objective of the Organization for Associate Degree Nursing (OADN) Alpha Delta Nu Nursing Honor Society shall be to recognize the academic excellence of students in the study of Associate Degree Nursing. The society shall encourage the pursuit of advance degrees in the profession of nursing as well as continuing education as a life-long professional responsibility. Additionally, the society shall participate in the recruitment of qualified individuals into the profession of nursing. Membership shall be offered to students after the first two semesters who have maintained a cumulative GPA of 3.0 or above and have earned a grade of B or better in each nursing class of the nursing program with no previous failures in any nursing course. Students would be invited to provisional membership at the beginning of the third semester of the core curriculum. Full membership would be granted if the student maintains the cumulative 3.0 GPA and earns a grade of B or better in all nursing courses in the third semester of study during the second year of the core nursing curriculum. Students shall have demonstrated conduct on campus and the clinical areas that reflects integrity and professionalism. Students are also expected to complete a volunteer/capstone project.

**E. Nursing Program Curriculum Committee**

The Curriculum Committee of the Nursing Faculty is a standing committee consisting of full-time faculty and two students, one from first/second semester and one from third/fourth semester. Through this committee, students are encouraged to participate in the curriculum review and revision process.

**F. Nursing Program Evaluation Committee**

The Evaluation Committee of the Nursing Faculty is a standing committee consisting of full-time faculty and two students, one from first/second semester and one from third/fourth semester. Through this committee, students are encouraged to participate in the evaluation process for the nursing program.

**G. Nursing Program Student Success Committee**

The Student Success Committee of the Nursing Faculty is a standing committee consisting of full-time faculty and two students, one from first/second semester and one from third/fourth semester. Through this committee, students are encouraged to participate in the development and evaluation of student success strategies for the nursing program.

Requests for student committee representatives are made at the beginning of each semester.
Section VIII: Classroom Policies

A. General Classroom Policies
1. Only students registered for the course are to attend class. Once a student withdraws for a nursing course(s), the student is not to attend or audit the class(es) and clinical experience.
2. If a student withdraws from the course, the student is not permitted to attend class.
3. No food or drink allowed in the classrooms.
4. Students should make childcare arrangements for periods when they will be on campus. In an occasional emergency situation, and only with permission of the instructor, a student may bring a child to class provided that the situation does not interfere with other students’ educational experience. If the instructor does not grant permission for the child to be present, the student must remove the child from College premises.

B. Classroom Attendance Policies
1. Attendance and punctuality are expected and are directly correlate with successful course completion. In case of an illness or emergency that causes an absence, contact the Course Coordinator via email.
2. In cases involving excessive absences from the course, the student may be administratively withdrawn from the course. An excessive absence is defined as one more absence than the number of classes per week during a fall or spring semester; the number of absences is prorated for accelerated sessions. Refer to Montgomery College policy related to attendance (Academic Regulation 9.823).

C. Classroom Conduct
Academic dishonesty is strictly prohibited. Examples of academic dishonesty are: cheating on exams, copying another’s work or allowing your work to be copied; plagiarism: presenting the work of another as your own in a paper, exam, or other assignment.

Students do not have the right to interfere with the freedom of the faculty to teach or the rights of students to learn. All students are expected to be respectful and considerate in the classroom. This includes turning off cell phones, avoiding argumentative or disruptive behavior or dominating the classroom discussion. Students are expected to refrain from disrupting the class by such behaviors as whispering, or otherwise distracting the instructor and students. All students should be familiar with the Montgomery College Student Code of Conduct. This document specifies standards of student behavior, including disciplinary procedures and appeal procedures. The full 15-page document is available on the college web site, www.montgomerycollege.com. Click on Student Services; then click on Student Code of Conduct. Refer to Appendix I

D. Classroom and On-Campus Lab Inclement Weather Policy
There is no relationship to Montgomery County Public School closings. Montgomery College will always operate on its regular schedule unless otherwise announced. If Montgomery College closes due to inclement weather, the Course Coordinator will contact you with a plan for the
missed class time. If there is a delayed opening and 50% of the class time can occur, then class will resume when the college opens, if not, the Course Coordinator will contact you with a plan for the missed class time. Depending on the nature of the incident, notifications of emergencies and changes to the College’s operational status will be communicated through one or more of the following means:

- College emergency responders: Security Officers, Campus Response and/or Support Teams
- Montgomery College ALERT. Registered users receive text and e-mail messages. Registration information at [www.montgomerycollege.edu/emergency](http://www.montgomerycollege.edu/emergency)
- Montgomery College Website at [www.montgomerycollege.edu](http://www.montgomerycollege.edu)
- Montgomery College main phone number at 240-567-5000
- Montgomery College cable channel 10 in Montgomery County
- Commercial radio and TV stations including:
  - Television (Channel 5 WTTG, Channel 7 WJLA, Channel 9 WUSA, News Channel 8)
  - Radio (WFRE (99.5 FM) – Frederick, WAMU (88.5 FM), WFMD (930 AM) – Frederick, WMAL (630 AM)

E. **Course Progression Policy - Minimal Satisfactory Grades**

1. In addition to the scholastic standards required of all students in the College, nursing students are required to achieve an overall course grade average of 75% or better in all required courses in the nursing program.
2. The overall course averages are assigned the following letter grades:
   - A= 90-100%
   - B= 80-89.9%
   - C= 75-79.9%
   - D= 60-75.9%
     - 70-74.9% are assigned the letter grade of” D.”
   - F=below 59.9%
3. The nursing program does not round course averages.
4. Each clinical nursing course grade will be determined by the following:
   - Theory score (Exams and Assignments)
     - The overall exam average must be 75%
     - The overall assignment average must be 75%
     - Refer to course syllabus for specific course deliverables
   - Clinical satisfactory/unsatisfactory
     - A satisfactory evaluation in the off-campus clinical component of each nursing course is required in order to pass the course.
     - A student who does not satisfactorily meet the course objectives will be unable to progress in the nursing curriculum.
5. Each non-clinical course will be determined by the assignments. There are no written exams in the non-clinical courses; with the exception of NURS 121 and 129.
**F. Academic Sanctions**

Faculty members may impose sanctions, as directed by the Dean of Student Services for violations of academic ethics and misconduct in the clinical areas.

**G. Disputed Grade Policy**

Students are responsible for following the instructions in the Policies and Procedures Manual for the College, Academic Regulations, 9.44 Disputed Grades.

**H. Graduation and Licensure**

After graduation from the Nursing Program, the Program Director must recommend the graduate to the Maryland Board of Nursing to take the National Council Licensing Examination (NCLEX-RN) that, if passed, lead to licensure in the state as a "Registered Nurse".

In certain instances the Board of Nursing may deny a license and/or deny a graduate the right to take the examination. The primary instances involve a person having been convicted of a felony or misdemeanor. If a student has ever been convicted of a felony or misdemeanor, the student is responsible for contacting the Board of Nursing Office to seek advisement regarding their licensure eligibility.

The Nursing Program has a scheduled NCLEX-RN review during the week following the end of scheduled classes. All graduating students are **required** to take the scheduled review course.

Within six to twelve months after graduation, students will be mailed a survey to evaluate the Nursing Program. The survey seeks information concerning students' feelings about their achievement of the program objectives and the major strengths and weaknesses of the program as well as recommendations for improvement. Please complete and return it so continuous improvement in the Program can be made.
Section IX: Examination Policies

A. Examination Accommodations

1. The student who has an identified testing accommodation may take exams in a situation appropriate to meet the individual learning needs as noted in the letter from Disability Support Services (DSS). The exams will be taken under supervision and may be administered prior to the regularly scheduled exam.

2. The student must schedule an appointment with the Course Coordinator at the beginning of each nursing course to provide and discuss the accommodations letter provided by the DSS office, which specifies the reasonable accommodations needed.

3. The Course Coordinator will document and establish the testing plan for the student. The student and Course Coordinator will sign the established plan.

4. The student will receive a copy of the plan and the Course Coordinator will keep a copy of the plan for the duration of the course.

5. This document will be shredded once the course is completed.

B. General Exam Day Policies

1. The Nursing Program has established that each exam item has 1.5 minutes per exam item as a guide for timing of the exams. Thus, students will have 60 minutes to complete a 40-item exam.

2. Students must present one form of authentication e.g. college ID, or other government issued photo ID to enter the classroom.

3. Students are required to leave all personal items (including cell phones) in either the front or back of the classroom. Please turn cell phones off.

4. Students are not allowed to access any personal items at any time during the exam.

5. Hats, hoods, scarves, gloves, wristwatches, and coats are not to be worn during the exam. Students who wear specific religious/cultural apparel should contact their Course Coordinator at the beginning of the semester of the course to review their religious/cultural apparel that may fall outside of these guidelines.

6. A student arriving late for an exam must complete the exam in the remaining scheduled time.

7. Faculty will not distribute index cards with exams. Students should be directed to use their hand to block lines of each item or use the back of their Scantron to block items or take notes during the exam.

8. Students may not take their own scratch paper into the classroom.

9. Students will be permitted to leave the classroom up to the last 10 minutes of the exam. No student will be permitted to re-enter after exiting the classroom.

10. After completion of the exam, the correct answers will not be announced.

11. Exam grades will be posted on Blackboard within 24 hours of the completion of the exam.
C. Exam Review Policies

1. Answer keys are available for the student to review during an appointment with a course faculty during 14 calendar days after the exam was given in class, starting the week following the exam. Exam booklets will be destroyed two (2) weeks after administration of the exam.
2. Individuals wishing to review exams need to meet with faculty during office hours or schedule an appointment. Individual review sessions are strongly encouraged for the student to understand the rationale behind the correct answer.
3. Exam review sessions with course faculty are required for any student who has an Academic Success Plan (ASP). Students assigned to a part-time faculty member or full-time clinical instructors are expected to review their exam with the assigned clinical partner who is a full-time faculty member also within two weeks of the exam.
4. Review of the Final/Last Exam
   a. Students may review the final/last exam with a full-time course faculty member up until 1600 the next business day after the exam.
   b. All appeals for exam item(s) must be received by the Course Coordinator via email no later than 0800 the following business day after the exam review.
   c. Faculty will meet and discuss the appeal(s) within two (2) business days from receiving the appeal(s).
   d. The student who submitted the appeal will be notified of the outcome of the appeal by the end of the two (2) business days.

D. Item Appeal Policies

1. To appeal an exam item a student must first meet with a faculty member to review the item(s) in question.
2. If a student still wishes to appeal an item, written rationale from course materials must be submitted to the Course Coordinator within two weeks of the exam.
3. The appeal will be presented to the full-time course faculty for review.
4. Upon faculty review, the Course Coordinator will notify the student of the decision.

E. Exam Make-Up Policies

1. All exams are to be taken at the scheduled time, except in cases of extenuating circumstances.
2. Students must notify the Course Coordinator as soon as possible if unable to take an exam on the scheduled date and time.
3. Students are responsible for completing a written request to the Course Coordinator to schedule a make-up exam.
4. The make-up exam may be an alternate exam based on the same test plan of the missed exam.
5. Make-up exams will be given within two weeks of the date of the scheduled exam. Failure to adhere to this policy and timeline will result in an exam grade of zero.
6. The Final Exam cannot be taken before the scheduled time. In the event a student cannot take the final exam due to extenuating circumstances, an incomplete grade will be assigned (See College policy regarding incomplete grade).
Section X: Clinical Policies

A. Technical Standards

Certain functional abilities are essential for the delivery of safe, effective nursing care. These abilities are essential in the sense that they constitute core components of nursing practice, and there is a high probability that negative consequences will result for patient/clients under the care of nurses who fail to demonstrate these abilities. A program preparing students for the practice of nursing must attend to these essential functional abilities in the education and evaluation of its students.

This statement of the Technical Standards of the nursing program at Montgomery College identifies the functional abilities deemed by the nursing faculty to be essential to the practice of nursing. Reference material used in the development of these standards include the Maryland Nurse Practice Act, The Functional Abilities Essential for the Delivery of Safe, Effective Nursing Care (a descriptive research study conducted by the National Council of State Boards of Nursing), and Core Components and Competencies of Associate Degree in Nursing (ADN) graduates (developed by the Council of Associate Degree Nursing of the National League for Nursing). The Technical Standards are reflected in the nursing program’s performance-based outcomes, which are the basis for teaching and evaluating all nursing students.

Consistent with its mission and philosophy, the Nursing Program at Montgomery College is committed to providing educational opportunities to students with disabilities. In accordance with the American Disabilities Act of 1990 and Section 504 of the Rehabilitation Act, the Nursing Program provides reasonable accommodations to otherwise qualified students with disabilities. The decision regarding appropriate accommodations will be based on the specifics of each case.

Students with disabilities who think they may require accommodation in meeting the Technical Standards of the nursing program should contact Disability Support Services (DSS) to discuss the process of identifying reasonable accommodations. Students should seek accommodation advising as soon as possible so that a plan for accommodation can be in place at the beginning of the program. Applicants seeking admission to the nursing program who may have questions about the Technical Standards and appropriate reasonable accommodations are invited to discuss their questions with Disability Support Services. Reasonable accommodation will be directed toward providing an equal educational opportunity for students with disabilities while adhering to the standards of nursing practice for all students.

Standards

The practice of nursing requires the following functional abilities with or without reasonable accommodations.

1. Visual acuity sufficient to assess patients and their environments and to implement the nursing care plans that are developed from such assessments.

   Examples of relevant activities:
   - Detect changes in skin color or condition
• Discriminating between abnormal and normal color of body fluids or exudates.
• Collect data from recording equipment and measurement devices used in patient care
• Detect a fire in a patient area and initiate emergency action
• Draw up the correct quantity of medication into a syringe
• Read fine print, such as medication and equipment labeling

2. **Hearing ability** sufficient to assess patients and their environments and to implement the nursing care plans that are developed from such assessments.
   Examples of relevant activities:
   • Detect sounds related to bodily functions using a stethoscope
   • Detect audible alarms within the frequency and volume ranges of the sounds generated by mechanical systems that monitor bodily functions
   • Communicate clearly in telephone conversations
   • Communicate effectively with patients and with other members of the health care team

3. **Olfactory ability** sufficient to assess patients and to implement the nursing care plans that are developed from such assessments.
   Examples of relevant activities:
   • Detect foul odors of bodily fluids or spoiled foods
   • Detect smoke from burning materials

4. **Tactile ability** sufficient to assess patients and to implement the nursing care plans that are developed from such assessments.
   Examples of relevant activities:
   • Detect changes in skin temperature
   • Detect unsafe temperature levels in heat-producing devices used in patient care
   • Detect anatomical abnormalities, such as subcutaneous crepitus, edema, or infiltrated intravenous fluid
   • Palpate pulses

5. **Strength and mobility** sufficient to perform patient care activities and emergency procedures
   Examples of relevant activities:
   • Safely transfer patients in and out of bed
   • Safely ambulate patients
   • Turn and position patients as needed to prevent complications due to bed rest
   • Hang intravenous bags at the appropriate level
   • Accurately read the volumes in body fluid collection devices hung below bed level
   • Perform cardiopulmonary resuscitation

6. **Fine motor skills** sufficient to perform psychomotor skills integral to patient care
   Examples of relevant activities:
- Safely disposes of needles in sharps containers
- Accurately place and maintain position of stethoscope for detecting sounds of bodily functions
- Manipulate small equipment and containers, such as syringes, vials, ampules, and medication packages, to administer medications

7. **Physical endurance** sufficient to complete assigned periods of clinical practice

8. **Ability to communicate** sufficiently to teach others, explain procedures, interact effectively with others, and convey information in writing.
   Examples of relevant activities:
   - Ability to speak, comprehend, read and write English at a level that meets the need for accurate, clear, and effective communication.
   - Ability to read, interpret, and communicate relevant data

9. **Emotional stability** to function effectively under stress and emergency situations, to adapt to changing situations, and to follow through on assigned patient care responsibilities, and to withstand human suffering.

10. **Cognitive ability** to collect, analyze, and integrate information and knowledge to make clinical judgments and manage decisions that promote positive patient outcomes.
    Examples of relevant activities:
    - Analytical thinking sufficient to transfer knowledge from one situation to another and problem solve
    - Ability to prioritize tasks to meet patient needs
    - Ability to use long-term and short-term memory to provide safe, effective nursing care

**B. Mandatory Clinical Clearance Requirements**

Students must complete all health requirements, criminal background check and urine drug screening through the vendor selected by the college. If a student is prohibited from attended a clinical facility based upon the results of these requirements, the student will be administratively withdrawn from the semester courses. Depending upon the nature of the results, the student may not be able to continue with the nursing program.

**Medical Health Record**

For incoming students, the required health records should be completed and submitted as instructed during program orientation. If items are not submitted by the due date, the student will be administratively dropped from the program and will be instructed to reapply. A physician, nurse practitioner, or physician assistant must complete the medical health record. The student must submit an annual medical physical report with complete CBC and urinalysis. Students are to maintain copies of all submitted forms. Refer to the admission requirements for health record maintenance and health record memoranda (memos) each semester.
Current students must maintain health record compliance with timely submission of all health record items. Failure to submit all outstanding items by the start of the semester will result in an administrative withdrawal. Students will not be allowed to attend clinical with outstanding items. This may result in a clinical failure for the course.

**Criminal Background Check and Drug & Alcohol Testing**
A criminal background check and drug & alcohol testing are required prior to entering the program. The background check and drug & alcohol testing must be done through the authorized vendor.

The process is repeated annually and when there is a gap in attendance.

*In the event of a background check issue, you may not be able to remain in the nursing program.*

**CPR Certification**
Cardiopulmonary Resuscitation (CPR) Basic Life Support, Professional Rescuer or Health Care Provider certification is required of all students in order to participate in clinical assignments. Students are responsible for obtaining certification prior to entering and maintaining certification throughout the Nursing Program. Documentation of certification must be on file. **No online CPR courses will be accepted.**

**Standard (Universal) Precautions**
OSHA regulations require strict adherence to standard precautions and are utilized in all nursing courses. Completion of the Infection Control is **required yearly** and documentation of a score of 100% is required.

**Health Insurance**
Nursing students are required to maintain health insurance coverage. The Health Insurance Statement Form must be submitted upon admission to the Nursing Program.

**Malpractice Insurance**
The nursing faculty strongly recommends that students have their own malpractice insurance for the duration of the program.

**C. Clinical Placement/Assignment**
Students will be assigned to clinical facilities based on available agencies and student learning needs. Each student must meet the specific requirements of each clinical site. Students who fail to meet required documentation guidelines will not be placed in a clinical site.

**D. Student Relationships with Clinical Agencies**
If a student has previous or present affiliation in any capacity (employee, patient, family) at a health care facility used for a clinical site, the student must inform the appropriate faculty member and may be assigned to a different facility. This provides a broader learning experience for the student and prevents role conflict.
**E. Clinical Supervision**
Students may not be in the clinical area without the supervision of a faculty member or designated representative.

**F. Health Insurance Portability and Accountability Act**
Students are expected to comply with all Health Insurance Portability and Accountability Act (HIPAA) and other privacy requirements while in attendance for the nursing program. To uphold these requirements students agree not to post or discuss any clinical experience or information regarding client data, the clinical agency, or its staff on any internet social media including but not limited to: emails, Facebook, Twitter, and MySpace. Removal of an individual's name does not constitute proper de-identification of protected health information. Inclusion of data such as age, gender, race, diagnosis, date of evaluation, or type of treatment or the use of a highly specific medical photograph may still allow the reader to recognize the identity of a specific individual. Such violations may result in a clinical failure, dismissal from the program and any federal sanctions regarding HIPAA violations.

1. Do not share, post or otherwise disseminate any information, including images, about a patient or information gained in the nurse-patient relationship with anyone unless there is a patient care related need to disclose the information or other legal obligation to do so.
2. Do not identify patients by name or post or publish information that may lead to the identification of a patient. Limiting access to postings through privacy settings is not sufficient to ensure privacy.
3. Do not take photos or videos of patients on personal devices, including cell phones. Follow employer policies for taking photographs or video of patients for treatment or other legitimate purposes using employer-provided devices.
4. Maintain professional boundaries in the use of electronic media. Like in-person relationships, the nurse has the obligation to establish, communicate and enforce professional boundaries with patients in the online environment. Use caution when distinction between a professional and personal relationship. The fact that a patient may initiate contact with the nurse does not permit the nurse to engage in a personal relationship with the patient.
5. Be aware of and comply with employer policies regarding use of employer-owned computers, cameras and other electronic devices and use of personal devices in the workplace.

**G. Cell Phone Usage**
Students must adhere to the facility’s policy regarding cell phone usage during clinical. Smart phones and cell phones with nursing reference material may not be accessed in patient care or community areas.

**H. Parking at Clinical Agencies**
Students are required to park in designated locations identified by each agency. Failure to follow this policy will result in a clinical unsatisfactory evaluation for that clinical experience.

**I. Signing Medical Records**
Students must sign any entry made in a patient record with their full first and last name and NSMC (e.g. Lee Smith, NSMC), unless instructed otherwise by faculty.
**J. Clinical Uniform Policies**

Students must follow the uniform policy at all times when in a clinical facility and in on-campus skills and simulation labs. The uniform policy mandates a specific style and color. Refer to the uniform vendor for specifications. The uniform is to be worn as follows:

1. Navy skirt or pants with white top. Skirts are to cover knees.
2. Uniform clothing should fit loosely enough to allow easy movement.
3. An optional white lab jacket with sleeves may be worn over the top. **No long sleeve shirts under uniform top.**
4. All white closed-toe/heel shoes and white hose are to be worn with the uniform. Plain white ankle length socks may be worn only with pants.
5. MC insignia is worn 2 inches below the shoulder seam on the left sleeve of the top and scrub jacket. It may be purchased at the Campus Bookstore or designated vendor and must be sewed in place.
6. Uniforms must be clean and free of odor. Maintain body hygiene to minimize odor.
7. Name pins are worn over the left upper chest. The pins may be ordered from the uniform supplier and should be blue with white lettering. The pin should have three lines:
   - the first line - Student Name;
   - the second line - Nursing Student;
   - the third line - Montgomery College.
8. Must wear their MC Student Photo ID and assigned facility ID.

**General Appearance**

- Hair must be neatly groomed, clean, and controlled. It must be kept back off the face and off the collar. Hair glitter, sequins, and colored barrettes/ribbons are not permitted. Hair must be a natural color.
- Head coverings are permitted for documented religious or medical reasons.
- Make up, if used, should be applied lightly.
- No artificial nails are permitted. Fingernails must be kept short and may not extend beyond fingertips. Clear nail polish may be worn.
- Facial hair must be neatly trimmed short and well groomed.
- Good personal hygiene must be maintained. Bathing and use of unscented deodorant before arriving in clinical agencies is required. Fragrances (oils, perfumes, colognes, etc.) may not be worn.
- Appropriate undergarments must be worn, must be white or beige in color, and should not be visible under uniform.
- No jewelry is to be worn with the uniform except plain metal wedding band and small pierced earring studs (no dangling earrings) limited to one in each ear lobe. No visible body jewelry is permitted (nose rings, eyebrow rings, tongue studs, etc.)
- Tattoos must not be visible and should be covered by clothing.
- No smoking or gum chewing while in uniform.

**K. Medication Calculation Competency Exam**

In order to administer medications safely, students must demonstrate the ability to calculate medication dosages accurately. This content is tested throughout the curriculum. Students must demonstrate competency in dosage calculations throughout all subsequent clinical courses. All
students are required to pass the math calculations test for their present course in order to pass medications in clinical. The math test must be taken and passed with a score of 96% or better by the required date. There will be no date changes or exceptions. A student unable to pass the test cannot pass medications in clinical and a clinical failure will result. Therefore, as a consequence, the student will be given a failing grade for course.

L. Clinical Attendance and Tardiness
Attendance in clinical and on-campus lab is required. If the student must be absent due to illness or emergency, it is imperative that the Clinical Instructor be notified prior to the time the assignment is to begin. Directions for this notification will be given at the time of orientation to each hospital/clinical agency. Failure to notify the clinical instructor prior to the absence may result in a clinical unsatisfactory evaluation.

If a student withdraws from a theory course, the student cannot attend clinical experiences.

Excessive absenteeism or tardiness
May result in a clinical failure for the course:
- 15 week course: More than 2 clinical absences may lead to a clinical failure.
- 7 week course: More than 1 clinical absence may lead to a clinical failure.
- All absences will require the completion of an alternative assignment.
- Clinical days cannot be “made up” by attending another clinical.
- Clinical day is evaluated as either satisfactory or unsatisfactory.

Tardiness
- First time late – verbal discussion and warning
- Second time late – documentation on Weekly Clinical Evaluation tool under “Professionalism” to reflect unsatisfactory behavior
- Third time late – student may be dismissed from clinical and same documentation as second time late. This may result in a clinical failure.
- Individual clinical faculty will determine what degree of lateness will result in clinical objectives not being met and the assignment of unsatisfactory for the day. The student may be required to do make-up work.

M. Clinical Inclement Weather Policy
If Montgomery College closes for inclement weather, students are not to report to the clinical agency. The clinical instructor will contact the students with a possible alternative clinical assignment. In the event that there is a delayed opening at the College, your clinical instructor will contact you with instruction for an alternative clinical activity, assignment or experiences.

N. Clinical Performance Criteria
A student must adhere to the following criteria in all nursing courses in order to receive a satisfactory clinical performance evaluation. The student will:
Attend all scheduled clinical experiences. Hospital clinical labs cannot be "made up" by attending another clinical, but students will be required to complete alternative assignments.

Follow College policies, including the Student Code of Conduct.

Follow all clinical agency policies.

Comply with the submission of all mandatory health record requirements.

Practice within the student role, as outlined by agency contracts reviewed in orientation, and according to the prevalent Nurse Practice Act. (http://www.dsd.state.md.us/comar/subtitle_chapters/10_Chapters.aspx#Subtitle27)

Follow the ANA Code of Ethics for Nurses. (Appendix II)

Dress appropriately in accordance with the Uniform Policy of the Nursing Program (see Section VIII, part J) and the individual agencies.

Follow the HIPAA guidelines and maintain patient confidentiality at all times.

Respect patient privacy and individual rights as outlined in the Patient's Bill of Rights.

Implement care in a nonjudgmental manner.

Document all nursing care accurately using correct English, grammar, and spelling.

Report immediately any errors of omission/commission.

Be punctual in reporting for clinical.

Timely submission of all written clinical related work.

Follow OSHA Guidelines for Standard Precautions.

Demonstrate ability to communicate accurately in verbal and written English.

Demonstrate physical and mental competence.

Demonstrate a caring attitude.

Provide safe care including the administration of medications and treatment. *Maryland Nurse Practice Act Section 10.27.11 page 7:* “F. Administration of medication is a nursing function. As such, the nurse retains full responsibility for medication administration.” MC Nursing students will not administer any medication via any route independently. The nursing student will be permitted to administer medication under direct supervision of nursing clinical faculty.

Comply with safe clinical practice guidelines. (Refer to Appendix V)

Failure to meet these criteria may be identified for possible disciplinary action by clinical instructor, which may lead to an unsatisfactory clinical evaluation that yields a failing grade in the nursing course.

**O. Clinical Evaluation**

Clinical evaluations, based on stated criteria, are required for all clinical course experiences, including simulation. Evaluation forms are provided in each course and students are required to complete these as a self-evaluation. Clinical performance is either satisfactory ("S") or unsatisfactory ("U"). All off campus clinical nursing courses require a clinical grade of "S" in order to pass the course. A clinical grade of “U” results in a course failure, even if the student passes the classroom theory portion.

**P. Dismissal from Clinical Area**

The faculty believes that the physical and emotional welfare of patients and their families have the highest priority. In addition, students must consistently demonstrate physical and mental
competence when in clinical areas in order to deliver patient care safely. (Refer to Technical Standards and the Rules and Regulations of the Maryland Nurse Practice Act.) Therefore, a student may be dismissed from the clinical area who:

- Demonstrates clinically unsafe nursing practice, which jeopardizes or has the potential to jeopardize patient welfare. A student who has demonstrated clinically unsafe behavior will be relieved of clinical responsibilities and referred to resources as appropriate.
- Fails to properly perform skills previously learned. Students are accountable for all skills previously learned. The student may be given a referral form which must be completed with the laboratory personnel. The lab staff will provide documentation to the clinical instructor. Skill(s) then must be evaluated by a faculty member.
- Fails to demonstrate physical and mental competence in clinical areas.
- Demonstrates behavior that jeopardizes or potentially jeopardizes the operation and management of the health care facility. This behavior may be related to many factors; e.g. physical or mental health problems, knowledge deficits, problem-solving skills deficits, anxiety, use of chemicals, oral or written communication skills, etc.
- Does not comply with timely health record submission.
- *A pattern of concern in any or all of these areas may result in dismissal from the Department.  
- Additionally, continued non-compliance may result in course failure and dismissal from the Nursing Program.

**Q. Clinical Failure**

If a student demonstrates continuing clinical deficiencies (see Section VIII, Part N), the student is at risk of clinical failure. If the decision is made to suspend or dismiss a student for all subsequent clinical experiences, the student will receive a failing grade for the nursing course.

The faculty will identify and document unsafe behaviors as well as counsel the student regarding unsafe clinical performance. Documentation from faculty and written evaluation(s) will be provided to the Course Coordinator, Nursing Program Chair and the Nursing Program Director. The nursing faculty for the course in which the student is enrolled, in consultation with the Nursing Program Chair, will make the decision regarding whether the student will be allowed to continue in the clinical area and any conditions placed on that continuation. This decision may be appealed to the Nursing Program Director. A student will have an opportunity to respond to the circumstances resulting in suspension or dismissal by submitting any relevant data pertaining to the incident(s) following the procedure in the *College Wide Policies/Procedures Manual*, Academic Regulations, 9.44 Disputed Grades.
Section XII: Withdrawal and Re-Admission Policies

A. General Matriculation Policies
All students must complete the Nursing Program within four consecutive academic years from the start of their first nursing course. If a student is not enrolled for one semester in a clinical nursing course, the student must:
   a. Have a GPA of at least 2.5
   b. Demonstrate clinical competencies of the last successfully completed clinical nursing courses. Students have one attempt to demonstrate competency.
   c. Along with course faculty, develop and complete an Academic Success Plan (ASP) for integration back into the program.
In addition to these guidelines, the student may be required to complete supplemental clinical course.

B. Withdrawal from the First Semester Courses
If a student withdraws from one first semester nursing course, the student must withdraw from the co-requisite nursing courses (NURS 113, 114, and 121). The student must re-apply to the program following the admissions criteria.

C. Withdrawal from the Second through Fourth Semester Courses
If a student is considering withdrawing from a course, he/she should confer with the faculty teaching the course and his/her academic advisor. If the student decides to withdraw a course, a schedule change form must be completed by the student, approved by a nursing faculty member and submitted to the Admissions and Records office by that semester's "last day to withdraw" deadline. It is the student’s responsibility to submit the withdrawal form to the Admissions and Records office. Failure of the student to do this will result in a grade of "F" being recorded in the student's record.

If a pre- or co-requisite, non-nursing course is dropped, the student may be administratively withdrawn from the concurrent nursing course, and will not be allowed to progress in the Nursing Program. A student who withdrew from the nursing course can no longer attend theory class or clinical experiences. Students cannot audit classes.

The student must complete an “Intent to Withdraw Form” (See Appendix V) to the Program Chair or designee. When the student plans to return to the Nursing Program, the student must schedule an appointment with the Nursing Department Chair to develop a plan for return. The student is responsible for completing the withdrawal process in a timely fashion.

A student who withdraws while failing theory or clinical is counted as a nursing course failure for re-admission.

Failure to initiate or comply with a plan may result in a student being ineligible for re-admission.

D. Withdrawal from the Program
If a student is considering withdrawing from the nursing program, he/she should first meet with the nursing faculty advisor, then meet with the Nursing Program Chair or designee. If the student
decides to withdraw from the nursing program, a schedule change form must be completed by the student, approved by a nursing faculty member and submitted to the Admissions and Records office by that semester's "last day to drop" deadline. Failure of the student to do this will result in a grade of "F" being recorded in the student's record. If a pre- or co-requisite, non-nursing course is dropped, the student may be dropped from the concurrent nursing course, and will not be allowed to progress in the Nursing Program.

The student must complete an “Intent to Withdraw Form” (See Appendix VI) to the Program Coordinator or designee.

E. Dismissal from Nursing Program
In Section VIII, Part N, behaviors are identified which may lead to dismissal from a clinical. A pattern of concern in any or all of these areas may result in dismissal from the Program. If a clinical agency refuses to have a student in its facility, other than is outlined in Section VIII, Part P & Q, the student will be dismissed from the program without the possibility of returning under any circumstances.

F. Re-admission to the Nursing Program
1. Re-admission is based on available space. In the event that there are more students seeking re-admission than there are spaces, priority re-admission is listed below. Within each category, students will be ranked according to GPA from highest to lowest, with a minimum GPA of 2.5. The procedure for selection will be as follows:
   a. MC students who withdraw from the program in good standing. This is considered an “exclusion” and not subject to policies related to unsuccessful attempts.
   b. MC students with one unsuccessful attempt in any nursing course within the program, with the exception of clinical failure.
   c. Transfer students in good standing.
   d. Foreign nurses who must take a nursing course in order to become licensed in the United States.
2. An unsuccessful attempt is defined as one course failure or one withdrawal while failing.
   a. Withdrawal while failing status is determined as a failing grade: less than 75% average after two exams.
   b. Students must submit an “Intent to Withdraw” form to the Nursing Program Chair at time of withdrawal.
   c. If a student withdraws failing while enrolled in a nursing co-requisite course, the student may continue in those co-requisite courses at the discretion of course faculty and the Nursing Program Chair.
   d. Students who re-apply to the nursing program after an unsuccessful attempt in NURS 113 or NURS 130 will have their initial attempt documented in their academic file and are subject to the policies regarding re-admission.
3. After one unsuccessful attempt within the Nursing Program the student may repeat the course. The student must:
   a. Have a GPA of at least 2.5
   b. Develop an Academic Success Plan (ASP) and discuss with faculty
   c. Comply with ASP
   d. The student may be required to complete a supplemental clinical course
4. Students unsuccessful in NURS 113 may reapply to the Nursing Program following the regular process for initial admission to the program. Students are limited to two unsuccessful attempts in NURS 113.

5. Students unsuccessful in NURS 130 may be eligible to apply to the traditional nursing program following the regular process for initial admission to the program. Students are limited to one attempt in NURS 130.

6. After two unsuccessful attempts within the Nursing Program, the student will not be permitted to continue in the nursing program.

7. In the event of an extenuating circumstance that resulted in two unsuccessful nursing course attempts, the student may request re-admission to the nursing program.
   a. Refer to Academic Regulation 9.644 for a list of qualifying circumstances.
   b. The student must submit a letter to the Nursing Program Chair within 10 business days after the last day of attendance in the course to request re-admission to the program.
   c. The Nursing Program Chair will meet with the student within 20 business days of receipt of the letter.
   d. Following the meeting, the Nursing Program Chair will provide a written response to the student within 14 business days.
   e. Please note this process is separate from the College’s Grade Appeal guidelines

G. Nursing Program Re-Admission Appeal Process

If the student is denied re-admission to the program by the nursing program chair, the student has the right to appeal the denied re-admission following two unsuccessful course attempts; the following process may be initiated:

- The student must submit a letter to the Nursing Program Director within 10 business days to request review of the decision, and submit supporting documents as indicated.
- The Nursing Program Director will review the documentation and arrange a meeting with the student within 20 business days.
- Following the meeting, the Nursing Program Director will present the decision to the student in writing within 14 business days.

Please note this process is separate from the College’s Grade Appeal guidelines
Appendix I: Student Code of Conduct

Excerpt from Montgomery College Student Handbook

Chapter: Student Affairs Modification No. 037
Subject: Student Code of Conduct

I. General
A. General Information. Students seeking information on how to resolve issues that may occur between the student and the College are encouraged to consult the College Student Handbook, the College Catalog, Class Schedule, or other College brochure; students can also seek guidance from counselors in the campus student development units, the campus Dean of Student Development, classroom instructors, or any other appropriate professional employee of the College.

B. Applicability of Student Code of Conduct. The academic and non-academic misconduct described in this code applies to all students enrolled at the College. For purposes of this Code, a Montgomery College student is defined as any person enrolled in credit or non-credit courses offered by Montgomery College, including all credit, non-credit, exploratory and developmental courses, offered on or off campus.

C. Academic Matters. The appeals process for academic matters other than academic misconduct is contained in the academic regulations of the College. The academic regulations are published in the College wide Policies and Procedures Manual, which is available in all campus libraries, and an abridged version is in the College Student Handbook.

Students assigned to health or other facilities as part of clinical courses or serving in internships as part of a course are expected to conduct themselves in a professional manner in the clinical internship setting and adhere to the standards of practice exemplifying conduct expected of professionals in the field. These professional behaviors are considered as part of the academic performance evaluation of a student. Action taken against a student for failure to meet academic performance standards will be considered an academic matter and not a disciplinary matter in violation of the Student Code of Conduct.

Accordingly, any such actions may be appealed under applicable provisions of the academic regulations and not under the Student Code of Conduct.

D. Off-Campus Activities. In their off-campus lives, i.e. in matters not related to College activities or college business, students shall not be considered under the control of the College, nor shall the College be held responsible for the off-campus activities or personal conduct of college students. Students who violate a local ordinance or any law risk the legal penalties prescribed by civil or criminal authorities. As an educational institution, the College need not concern itself with every violation of the law. Nevertheless, the College may take disciplinary action against those students whose behavior off-campus, or unrelated to College activities or functions, indicates that they pose a serious and substantial danger to others.

II. Academic Dishonesty and Misconduct

The maintenance of the highest standards of intellectual honesty is the concern of every student and faculty member at Montgomery College. The College is committed to imposing appropriate sanctions for breaches of academic honesty. The list below is not an all-inclusive list of all prohibited behavior. Nothing in this section shall be interpreted to preclude a faculty member or academic unit from issuing supplemental guidelines giving examples of plagiarism or other forms
of academic dishonest and academic misconduct which are pertinent to the subject matter of the class.

A. Academic Dishonesty or Misconduct Can Occur in Many Ways. Some common forms include:

Plagiarism: Each student is expected to present his or her own work. All papers, examinations, and other assignments must be original or explicit acknowledgment must be given for the use of other persons’ ideas or language. Examples of plagiarism as it might occur in term papers, research papers, laboratory reports, and other written assignments are listed below.

- Failure to use quotation marks: All work which is quoted directly from a source should be enclosed in quotation marks and followed by a proper reference, giving the exact page or pages from which the quote is taken. Failure to properly identify a quotation, even if a footnote source is provided, is plagiarism.

- Failure to document ideas: When a student uses one or more ideas from and/or paraphrases a source, he or she must give the exact page or pages from which the ideas or paraphrasing were taken.

- False documentation: Falsifying or inventing sources or page references is plagiarism.

Ideas that are common knowledge (e.g., George Washington was the first president of the United States; Albert Einstein developed the theory of relativity, etc.) need not be documented in student papers.
Appendix II: American Nurses Association Code of Ethics

- The nurse, in all professional relationships, practices with compassion and respect for the inherent dignity, worth and uniqueness of every individual, unrestricted by considerations of social or economic status, personal attributes, or the nature of health problems.
- The nurse’s primary commitment is to the patient, whether an individual, family, group, or community.
- The nurse promotes, advocates for, and strives to protect the health, safety and rights of the patient.
- The nurse is responsible and accountable for individual nursing practice and determines the appropriate delegation of tasks consistent with the nurse’s obligation to provide optimum patient care.
- The nurse owes the same duties to self as to others, including the responsibility to preserve integrity and safety, to maintain competence, and to continue personal and professional growth.
- The nurse participates in the advancement of the profession through contributions to practice, education, administration, and knowledge development.
- The nurse collaborates with other professionals and the public in promoting community, national, and international efforts to meet health needs.
- The profession of nursing, as represented by associations and their members, is responsible for articulating nursing values, for maintaining the integrity of the profession and its practice, and for shaping social policy.

FAQ’s

ELIGIBILITY

1. If I am accepted in the Montgomery College Nursing program and meet the requirements for the Dual Admission program, will I automatically become a Dual Admission student?

   No, a completed application to UMSON is required for consideration in the Dual Admission program.

2. I already have a Bachelor’s degree and I am now in MC’s Nursing program. If I meet the eligibility requirements, can I apply for the Dual Admission program?

   Yes, any MC Nursing student who meets the eligibility requirements for the Dual Admission program can submit an application for consideration.

PRE-REQUISITE COURSEWORK

1. Can NUTR 101 (Introduction to Nutrition) fulfill the nutrition requirement?

   Yes.

2. Can BSAD 210 (Statistics for Business and Economics) fulfill the statistics requirement?

   Yes.

3. My science coursework is older than 10 years. Do I need to retake the course(s)?

   Licensed nurses and dual admission applicants for UMSON’s RN-to-BSN who have completed the science coursework are not required to complete the science prerequisites (Chemistry, Human Anatomy, and Physiology I, Human Anatomy and Physiology II, and Microbiology).
4. Can Advanced Placement (AP) courses taken in high school fulfill elective requirements?
   No. Advanced Placement courses cannot be used to satisfy requirements. However, certain scores on the AP exam can be used to fulfill certain UMSON prerequisite requirements.

APPLICATION PROCESS

1. Does UMSON also need letters of recommendation or TEAS scores for the Dual Admission Program application?
   No. Only the following materials are needed: online application, application fee, official transcripts from every college or university attended, essay (part of online application), resume, and UMSON’s prerequisite course list.

2. Should I fill out the RN-to-BSN application or the BSN application? How will UMSON know I am applying for the Dual Admission Program?
   MC students interested in the Dual Admission Program will complete the RN-to-BSN application (NURS-RN-BSN from the application dropdown menu). In the Application Checklist in the Additional Information section, click YES that you are applying as a partnership applicant and specify that you are from Montgomery College. Note: The term for which you apply should reflect the semester you plan to be enrolled solely at UMSON after having completed all of the requirements for the ADN and the pre-requisites for the RN-to-BSN.

3. Once I am accepted in the Dual Admission Program, will I have to go through any additional application process to complete my last year at UMSON or does that happen automatically?
   It happens automatically provided that you maintain the criteria outlined to progress to UMSON.

PROGRAM

1. Can I complete the program in another state using the online option?
   Please contact UMSON for further information.

2. What are the required clinical hours for students who choose the online option?
   UMSON’s NURS 467 Public Health Essentials for the Registered Nurse requires 90 hours of practice/clinical time in addition to coursework, which is required for all students.

3. Are classes taken at the Takoma Park/Silver Spring Campus or UMSON?
   The courses for the Montgomery College nursing program are completed at the College’s Takoma Park/Silver Spring Campus. Coursework for the UMSON program can be completed online or in person at the following locations:
   - University of Maryland School of Nursing 655 W. Lombard Street, Baltimore
   - The Universities at Shady Grove 9630 Gudelsky Drive, Rockville
   - Laurel College Center 312 Marshall Avenue, Ste. 205, Laurel

Appendix V: Safe Clinical Practice

Clinical Expectations for Safe Professional Practice

Course: **NURS XXX; FA 2016**

**Safe Clinical Practices**

- Students are expected to demonstrate growth in clinical practice through the application of knowledge and skills from previous and concurrent courses.

- Students are expected to demonstrate growth in clinical practice as they progress through courses and to meet clinical expectations outlined in the clinical evaluation tool.

- Students are expected to prepare for clinical practice in order to provide safe, competent care. Preparation expectations are found in the “Course Guide (On-campus Lab section) /textbook.

**Unsafe Clinical Practices**

Maryland Nurse Practice Act Section 10.27.11 page 7: “F. Administration of medication is a nursing function. As such, the nurse retains full responsibility for medication administration.” MC Nursing students will not administer any medication via any route independently. The nursing student will be permitted to administer medication under direct supervision of nursing clinical faculty.

Unsafe clinical practice is an occurrence or pattern of behavior involving unacceptable risk. Unsafe clinical practice is behavior that places the client, staff, clinical instructor, and fellow students in either physical or emotional jeopardy. Clinical dismissal may be invoked when the student demonstrates unsafe practice.

Physical jeopardy is the risk of causing harm not limited to the following:

- Leaving a upper bedrail down
- Actually causing harm
- Not verifying patient with two identifiers
- Not prepared to perform previously learned skills
- Administering any medication via any route with our clinical faculty supervision.

Emotional jeopardy means that the student creates an environment of:

- Anxiety or distress which places the client at risk, and who
- Demonstrates insubordination, lack of respect – verbal/nonverbal with clinical instructor, staff, and fellow students.
  - Incivility is defined as rude or impolite attitude or behavior that a student demonstrates:
    - Be aware of and comply with hospital policies regarding use of employer-owned computers, cameras and other electronic devices and use of personal devices in the clinical or lab environment.
    - Do not make disparaging remarks about classmates, patients, or faculty. Do not make threatening, harassing, profane, obscene, sexually explicit, racially derogatory, homophobic or other offensive comments.
    - Do not post content or otherwise speak on behalf of Montgomery College or health care facility unless authorized to do so and follow all applicable policies.
Violation of HIPAA:

- Do not share post or otherwise disseminate any information, including images, about a patient or information gained in the nurse-patient relationship with anyone unless there is a patient care related need to disclose the information or other legal obligation to do so.
- Do not identify patients by name or post or publish information that may lead to the identification of a patient. Limiting access to postings through privacy settings is not sufficient to ensure privacy.
- Do not refer to patients in a disparaging manner, even if the patient is not identified.
- Do not take photos or videos of patients on personal devices, including cell phones. Follow employer policies for taking photographs or video of patients for treatment or other legitimate purposes using employer-provided devices.
- Maintain professional boundaries in the use of electronic media. Like in-person relationships, the nurse has the obligation to establish, communicate and enforce professional boundaries with patients in the online environment. Do not establish any online or social contact with patients or former patients. Online contact with patients or former patients blurs the distinction between a professional and personal relationship. The fact that a patient may initiate contact with the nurse does not permit the nurse to engage in a personal relationship with the patient.

Clinical Dismissal

A student may be dismissed from clinical and on-campus laboratories at the clinical faculty’s discretion for persistent nonattendance, unsafe clinical practice, and/or failure to produce assignments to the satisfaction of the instructor. Excessive absences may also result in a student being dropped from the Nursing Program (see college policy & procedures). Students dismissed will fail the course.

In the event that a student demonstrates unsafe behavior, the following may occur:

- Students will be verbally counseled and written up using the Clinical Incident Form. The student may be counseled by Nursing Administration. The write-up will become part of the student’s permanent file.

I have read and understand the above clinical safe and unsafe guidelines and agree to abide by them.
