Workshop Announcement

Getting Back to Backward Design

Thursday, March 21, 2019
2:00 - 3:00 p.m.
TPSS, CM 221
Presenter: Phil Bonner

**Backward design** is a method of designing curricula by determining goals before selecting instructional methods and assessments. This approach to curriculum design runs counter to more traditional methods and provides a fresh look at the tasks of unit planning, lesson planning, and course assessment. In this one-hour workshop, we will discuss how backward design as applied by faculty members can lead to increased student success.

Earn an hour of professional development in a relaxed, convivial setting.
